CLOUD-BASED FREIGHT MANAGEMENT SYSTEM

## ALL-IN-ONE FREIGHT FORWARDING SOFTWARE SOLUTION

C Freight is a cloud-based software for Freight Forwarding companies and Custom House Agencies. Being a cloud-based system, you don't need to set up an IT infrastructure to get started.

### Logistics Operations

Operate safely and in compliance with all established policies and procedures. Works in collaboration with trucking operations to ensure high-quality customer service. Plan, schedule and review workload and manpower to meet operational targets on a cost-effective basis.

### Complete Management

Manage all the complexities of freight shipping operations, freight management, forwarder management, customer service, accounting, and logistical management with simple, easy-to-understand user interface. C Freight offers user-definable workflows and approvals to suit your unique needs.

### End-To-End Accounting

Everything you need to create invoices for both operational and non-operational processes, job card with expense and revenue details and auto-generation of purchase and sales invoices to prevent human errors so your team spends less time on accounting more on business development.
